

Wolf by Nathan J. Zeichner ©2004

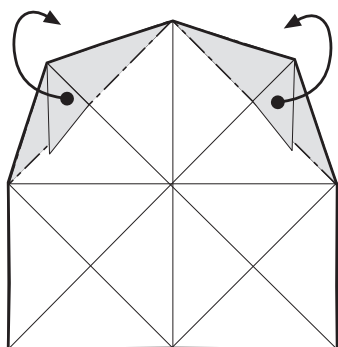

1. White side up for a colored wolf.
Fold the paper in half along both the diagonals, vertical and horizontal lines.

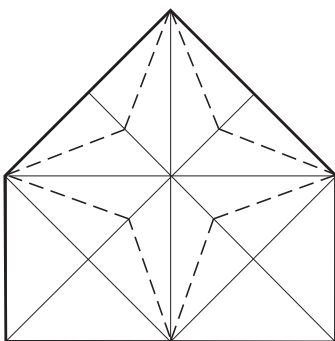

2. Blintz and then unfold.

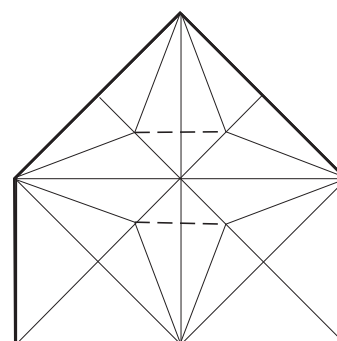

3. Rabbit Ear the top two corners

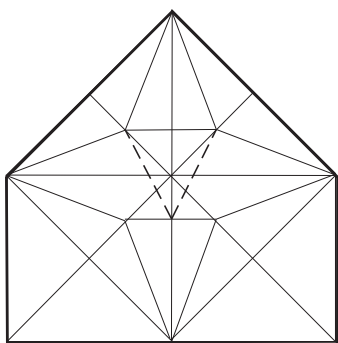

4. Fold the newly formed rabbit ears back along the top blintz creases.

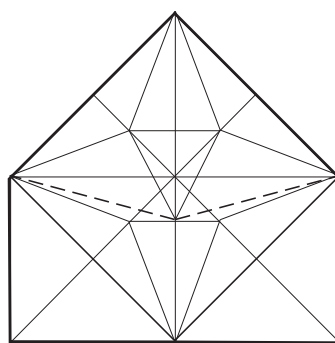

5. Put in creases for a bird base and unfold.

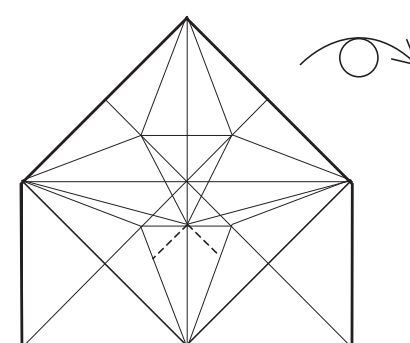

6. Crease between the two inside points (top and bottom) of the creases made in step 5.

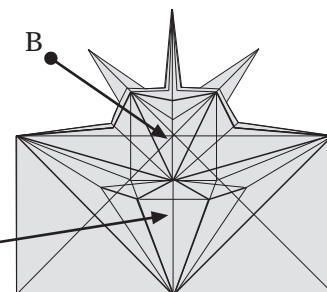

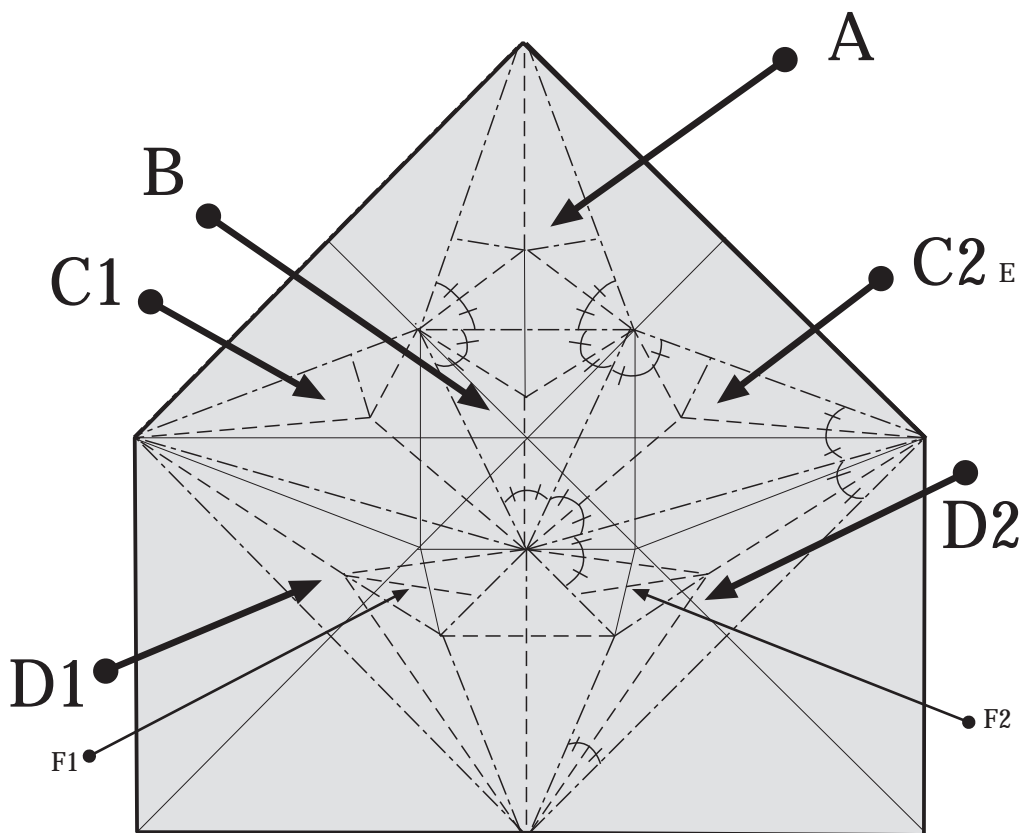

7. Crease from the top corner down to the midpoint of the crease made in step 6 on both sides.

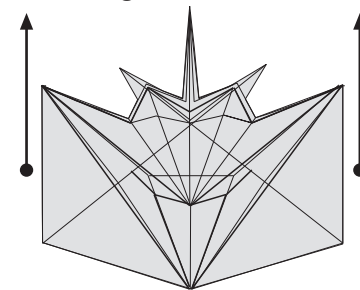

8. Crease from the outer points to midpoint of the crease made in step 6.

9. Crease from the midpoint of the crease made in step 6 to meet the crease made in step 5. This crease will be parallel to the main diagonal crease made in step 1.

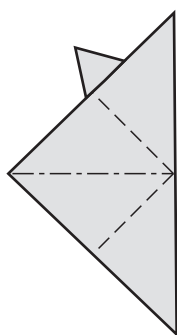

10A. Front view. Triangle A has sunk and B is beginning to sink. Once all the triangles are put in, B will come down and go over E.

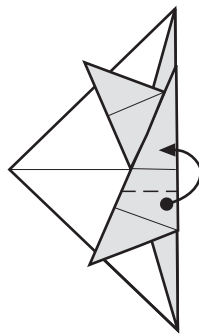

10B. Pull the outer points up once all the creases have been put in. Then fold in half vertically.

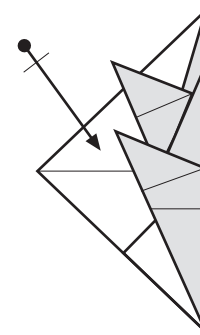

10. Fold along the mountains and rabbit ear sink the triangles A, B, C1, C2, D1 and D2. Fold triangles in alphabetical order (Numbers indicate that they can be done together). Make sure all the of rabbit ear sinks come together so the edges meet. This will make all the layers come together on one edge. Creases F1, F2 should form naturally at the end.

11. Side View. Fold the top flap in half and pull it down to meet the bottom tip. Fold the top point to meet the bottom tip.

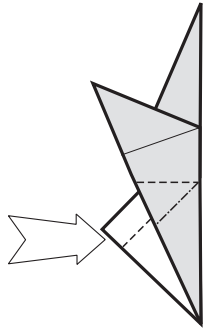

12. Fold the flap which is highest upwards as far as it can go.

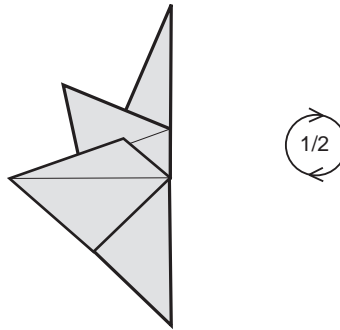

13. Repeat steps 11 and 12 on the other side.

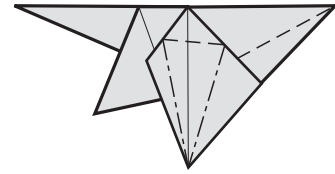

Wolf by Nathan J. Zeichner ©2004

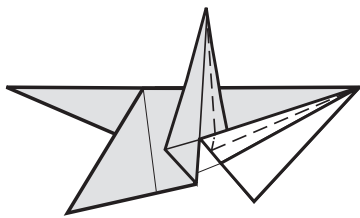

14. Open up the top layer and squash fold.

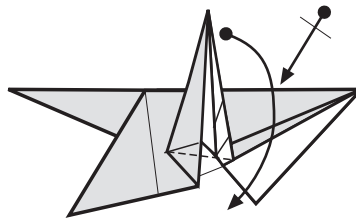

15. Rotate by 90 degrees

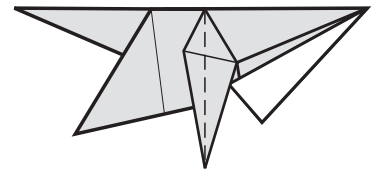

16. Petal fold upwards. This will cause the layer behind to fold upwards as well.

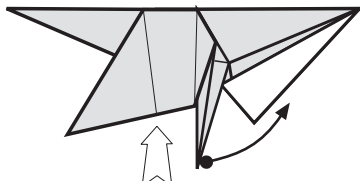

17. Fold the white edge downward to meet the edge of the layer. Then fold the flap of the petal to meet the edge of the petal.

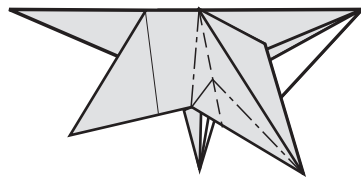

18. Fold the petal down and repeat steps 14, 16 and 17 on the opposite side.

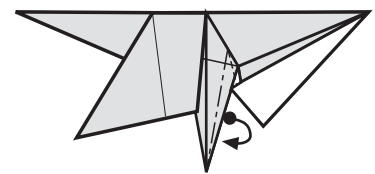

19. Fold the petal in half.

20. Open up the layer and spread out the petal.

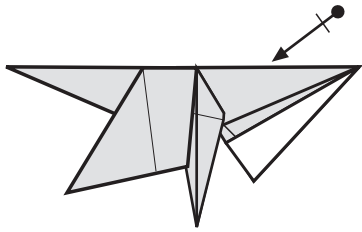

21. Refold the petal but putting the triangle flap under the hind leg.

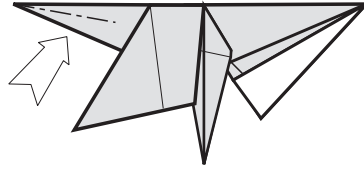

22. Thin out the petal again by mountain folding the open side in half.

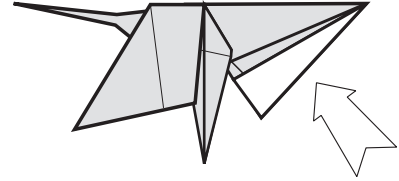

Wolf by Nathan J. Zeichner ©2004

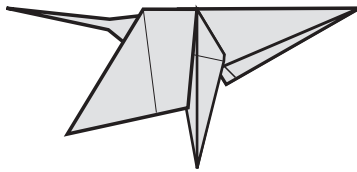

23. Repeat steps 20-22 on other side.

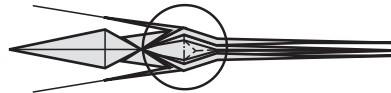

24. Pinch the back tail about 2/3 of the way. This will flatten out the tail.

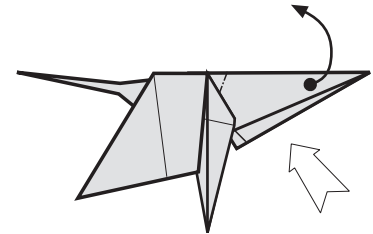

25. Reverse fold both the white layers in the front.

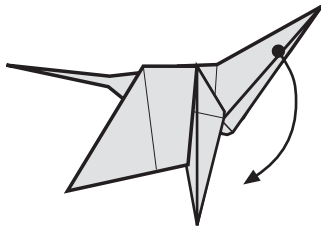

25A. A side view of the model once the white layers have been inside-reverse folded in.

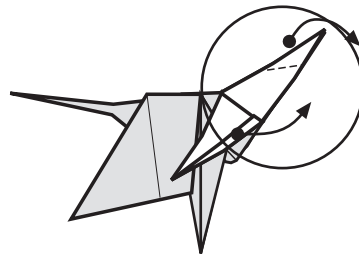

26. Top view. Open up the center and pinch the side of the head and neck section. Then pull up the head and create a rabbit ear in the center of the model.

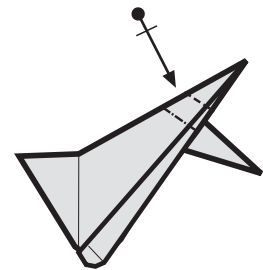

26A. Same as step 26, but a side view.

27. Take the most outer layer of the front piece and peel it back. Do not crease or you will have a crease along the neck!

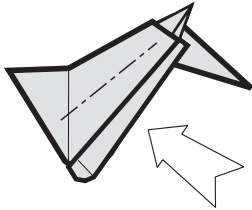

28. Outside reverse fold the middle layer out to create the head (size to taste). Then refold the outer layer.

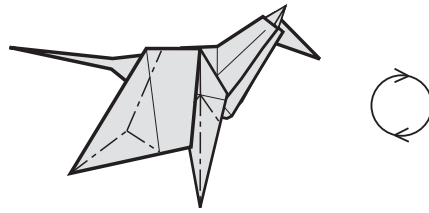

29. Zoom in. Pleat the outer most layer in the front to make the ear (size to taste)

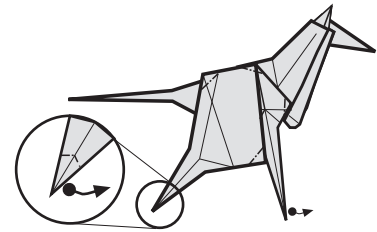

Wolf by Nathan J. Zeichner ©2004

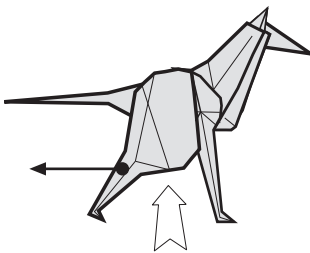

30. Shape the neck by pinching the sides.

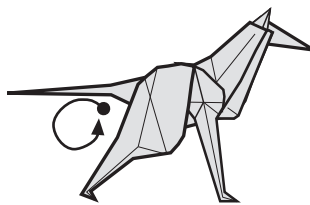

31. Pinch the legs so they come to a point. Repeat on other side. Then rotate so the legs are both on the same plain.

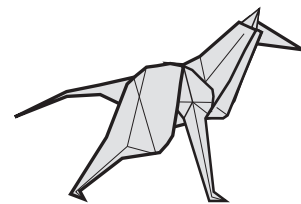

32. Fold back the corners of the legs. Then fold forward the tips of the legs for feet.

33. Shape the body by opening up the center and pinching to taste.

34. Use your finger and roll the tail to give it a curve. This step is optional.

35. Finished.
